

Curriculum Vitae

Seongpil Yum

T. +82-10-3009-8594 / F. +82-52-217-2972 / kalmia63@unist.ac.kr
Ulsan National Institute of Science and Technology
UNIST Gil-50(689-798), Ulsan, Republic of KOREA

AFFILIATION

Researcher of Nuclear Engineering
Ulsan National Institute of Science & Technology (UNIST)
UNIST-gil 50, Ulsan Metropolitan City, Republic of Korea, 689-798

EDUCATION

Undergraduate

- 1st track: Nuclear Science & Engineering
- 2nd track: Physics
- UNIST, Ulsan, Korea, (2010.3 - Present)

WORK EXPERIENCE

- Internship
 - Korea Hydro & Nuclear Power Central Research Institute (KHNP, June 26 ~ August 5, 2016)
 - University of Illinois Urbana-Champaign, Analysis of Reactor Transients and Stability laboratory (UIUC, January 2 ~ February 24, 2017)

CERTIFICATES

- Awards & Scholarship
 - Nuclear Technology Undergraduate Student Society Scholarship, National Research Foundation of Korea (June 2016 ~ June 2017)
- Training (Domestic)
 - Nuclear engineering experiment training course (KAERI, August 29 ~ September 2, 2016)
 - Nuclear Reactor Core Design Theory and Training course (KAERI, June 27 ~ June 30, 2017)
 - Tachyon2 System training course (KISTI, July 7, 2017)
- Computer skills
 - MATLAB
 - FORTRAN
 - MATHEMATICA
 - PERL
- Reactor Core Analysis Code
 - CASMO
 - SIMULATE

International and Domestic Conferences

1. **Seongpil Yum**, Jaemin Kim, Ho Cheol Shin, Minyong Park, Jiwon Choe, Peng Zhang, and Deokjung Lee* (2016), “Accuracy Improvement of Axial Power Shape Reconstruction Using GMDH Algorithm”, *Transactions of the Korean Nuclear Society Autumn Meeting*, Gyeongju, Korea, October 27-28, 2016(accepted for presentation)
2. **Seongpil Yum**, Jiwon Choe, Sooyoung Choi, Peng Zhang, and Deokjung Lee* (2017), “Pin-by-pin core calculation with SPH factor for improving accuracy of pinwise calculation”, *Transactions of the Korean Nuclear Society Spring Meeting*, Jeju, Korea, May 18-19, 2017 (accepted for presentation)

ENGLISH CERTIFICATION

TOEIC 850

UNDERGRADUATE COURSES TAKEN

Fundamentals of Nuclear Engineering
Introduction to Nuclear Reactor Theory
Introduction to Nuclear Fuel Cycle Engineering
Introduction to Nuclear Reliability Engineering
Nuclear Reactor Numerical Analysis
Nuclear Materials Engineering & Experiment
Nuclear Radiation Engineering & Experiment
Nuclear Engineering Design and Lab IV
Differential Equations
Applied Linear Algebra
Mathematical Physics I
Quantum Physics I
Solid Mechanics I
Fluid Mechanics
Fundamentals of Electromagnetics
Thermodynamics of Materials
Engineering Programming
